

OVERWATCH TOWER

Mobile Security Systems To Protect Your Jobsite

Prevent Theft and Vandalism

Protect every piece of equipment, from the heaviest generator to the smallest wrench, even if your jobsite sprawls across acres of outdoor space.

Fast Setup

With CST's Overwatch System you can have everything on your jobsite secured within 15 minutes so you can focus on getting the job done.

Super Simple

After watching a 6 min setup video, you'll be able to deploy comprehensive security on your jobsite even if you have never touched a security system before in your life.

Ease of Use

End the constant battle of trying to educate your crew on important security practices that no one follows.

With CST's Overwatch System you can arm the entire system with the push of a button on your smartphone from anywhere in the world even if the last man out forgot to do it.

Made Here, Supported Here

From flat steel to finished product, CST products are designed, built, and supported by friendly folks right here in the United States.

Real Support

No more dealing with outsourced support call centers or impersonal automated answering systems. Our customer care, technical support, and 24/7 dispatch operators are all US-based and ready to take care of you.

Built To Last

There is nothing flimsy about our system, we use only the highest quality materials so that you can rest easy knowing you have a system that was built to last.

Wireless Access

Wireless cellular data gives you access to your jobsite from wherever you are with a simple button click on your phone.

Flood Light

Powerful floodlight to illuminate the area and deter theft and vandalism.

Heavy Duty

Solid steel construction gives you a sturdy trailer that can hold up to the tough weather and harsh environments found on the jobsite.

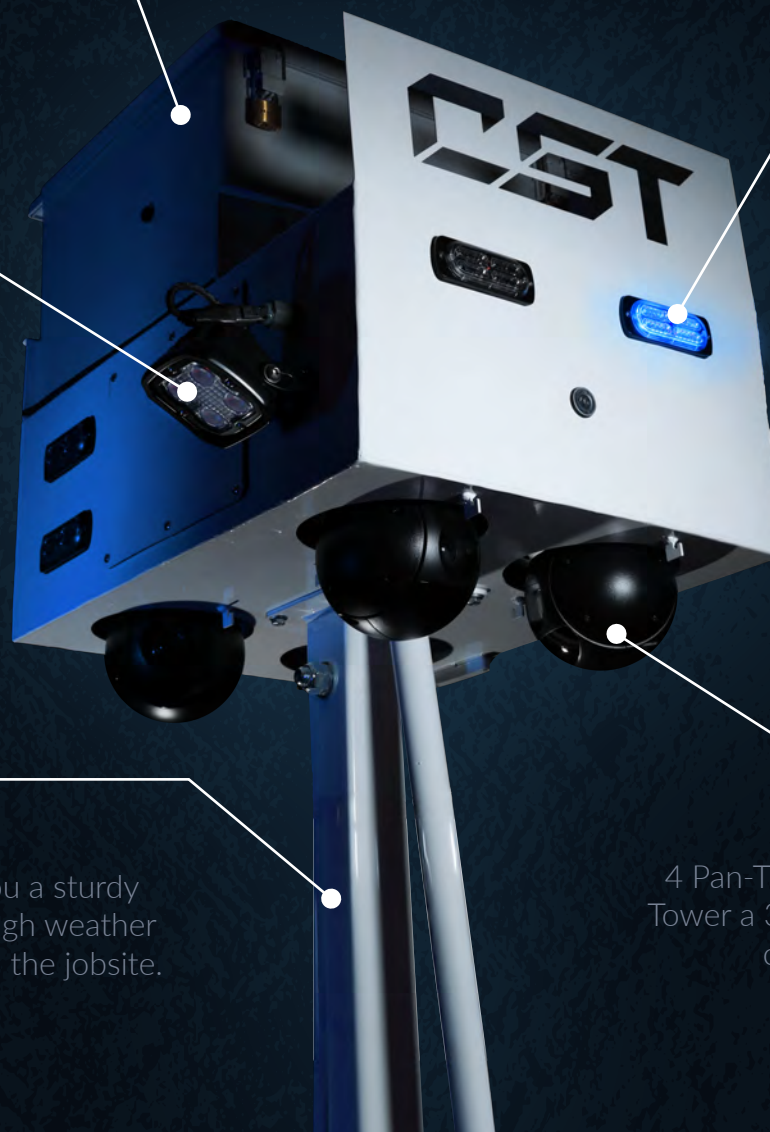

Deterrent

Equipped with flashing red and blue lights the Tower can deter potential thieves making it evident the jobsite is secured and protected.

Live View

4 Pan-Tilt-Zoom cameras give the Overwatch Tower a 360 degree view of the jobsite that you can view live using your phone.

Easy Setup

With our hydraulic actuated mast and solar pane frame, deploying the Overwatch Tower can be done with the press of a button. No need to hand-crank the mast into position so you can save time and energy.

Convenient & Secure

The Overwatch Tower can quickly and easily be connected and towed onto any jobsite for fast deployment.

Once on-site you can prevent the Tower from being towed by anyone else using our folding hitch pin design.

Sturdy Base

With heavy duty extendable arms and strong adjustable height feet, you can quickly create a wide sturdy base and keep it level regardless of uneven terrain.

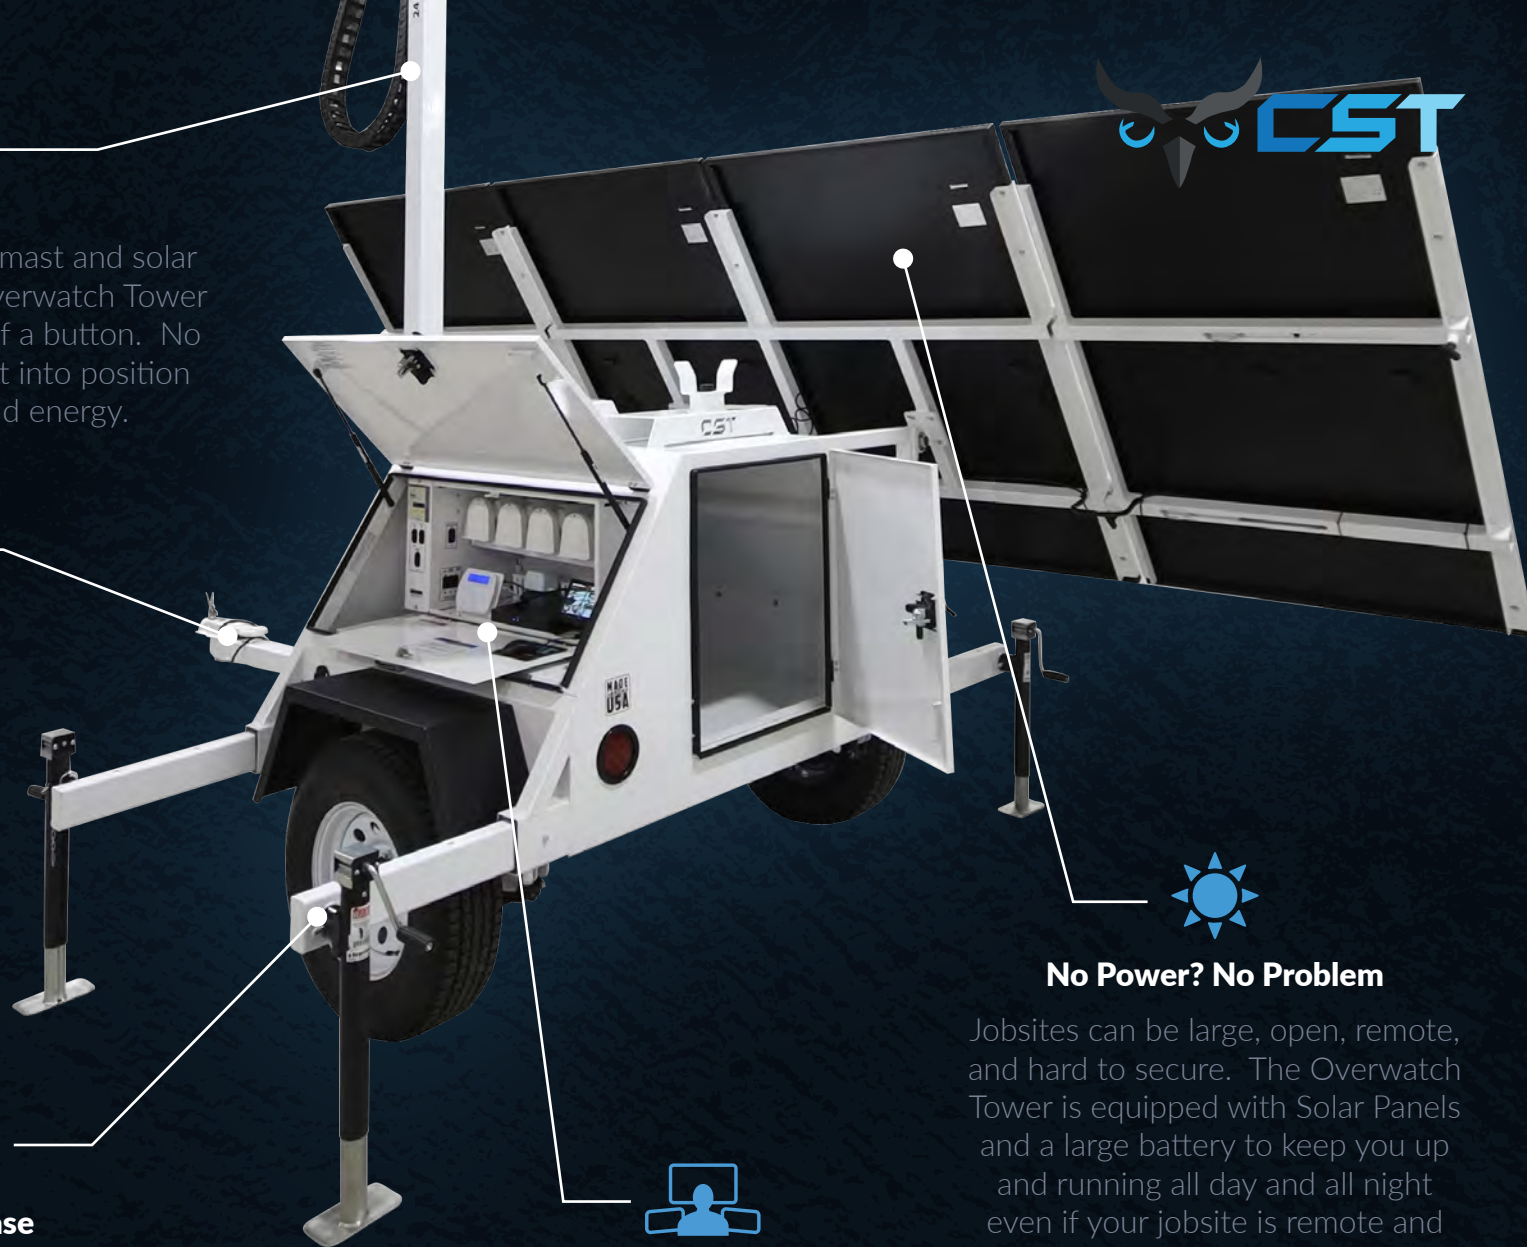

Control Center

On board control center, view and control all cameras, raise and lower mast, adjust solar panel angle, and arm and disarm the system.

No Power? No Problem

Jobsites can be large, open, remote, and hard to secure. The Overwatch Tower is equipped with Solar Panels and a large battery to keep you up and running all day and all night even if your jobsite is remote and has no power onsite.

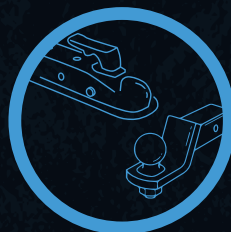

Protect Your Jobsite **TODAY!**

Call
